EXPERIENCE

Unitec Institute of Technology, Mt Albert— PASS Leader / Teaching Assistant

MARCH 2025 - PRESENT

- Support students with course activities and help apply programming and computing concepts.
- Explain technical concepts clearly to students with different levels of understanding.
- Mentor students by providing guidance, encouragement, and practical problem-solving support.

Various Architecture Firms — *Architectural Designer*

JAN 2017 – MAY 2024

- Produced and developed architectural drawings and design documentation.
- Managed project deadlines and contributed to multiple projects at different stages.
- Communicated with colleagues, consultants, and clients to resolve design and documentation issues.
- Developed strong skills in teamwork, critical thinking, organisation, and attention to detail.

EDUCATION

Bachelor of Computing Systems

Unitec Institute of Technology – Mt Albert
Expected Completion: June 2027

Building on my knowledge from my diploma, this course teaches software development skills in all fields like full stack web development, mobile apps, and database management. In addition it covers the SDLC phases and methodologies, project management, and collaborative development using GitHub Repos, Projects, Issues, etc.

New Zealand Diploma in Information Systems

Unitec Institute of Technology – Mt Albert
Completed: June 2025

This course covers IT foundations in programming, databases, networking, operating systems, and the Waterfall Methodology.

PROJECTS

Remote-Controlled Aircraft – W.I.P

- Designing and building a remote-controlled aircraft from scratch in collaboration with a collaborator studying Aerospace Engineering.
- Using two ESP32 microcontrollers as the core control system.
- Applying programming, electronics, troubleshooting, and systems-integration skills.

Portfolio Website – W.I.P (https://veragu01.github.io/UVeragos_Portfolio_Website/)

- Built a portfolio website to showcase personal projects outside of study.
- Designed in Figma and developed using HTML, CSS and Bootstrap.

Video Game - Complete (https://tinyurl.com/3yd9ya8j)

- Planned, designed and built in one week as part of a game jam.
- Developed with GDscript in Godot collaboratively.

PERSONAL

In my time away from study and work, I raise my two children, enjoy going to the gym, rock climbing and playing D&D with friends. All of which helps me maintain a healthy and balanced lifestyle.

SKILLS

Programming: C#, Java, JavaScript, XML, HTML, CSS, Python
Databases: SQL
Tools: GitHub, PyCharm, Visual Studio, VS Code, Eclipse, Android Studio, Figma
Other: Systems analysis and design, SDLC methodologies, troubleshooting, teamwork, communication, mentoring
